

BLOOM FORGE FIRE TONGS

Roy Bloom, APF CJF has been shoeing and blacksmithing for over 40 years. In his shop in Northern Wisconsin, he has been producing the best value forging tools in the market for over 25 years, always with his remarkable attention to detail. The Bloom tongs are all drop forged- not cast or welded . He has made many thousands of tongs over the years and he still works through every step to make sure the tongs are assembled and fit properly. We have a few shots of him working in the shop, doing the final steps of fitting the tongs to the appropriate dimension. Whether it is inches or millimeters, he puts them right on the money.

Assembled tongs ready to be sized.

Adjustment of the jaw to appropriate dimension.

Stamping size on rein.

Final adjustment of reins to a parallel position.

Finished product in use.

Bloom tongs set precisely for the size of stock, with parallel reins for efficient and comfortable use.
