Balancing the Equine Hoof: Understanding the 12 Reference Points with Roy Bloom CJF & Dave Farley CF

"Dear Dave - Thank you for a very, very productive day with my students. Your 12 Points of Reference DVD enabled the students to apply rules of balance in a way that they could see them. I have always wondered if the students really see what I see on a foot when I critiqued their trim. Now I can show them."

Bob Smith CF, Pacific Coast Horseshoeing School LLC

Other DVDs from HIP:

- Fundamentals of Forging # 1 – The Hammer, Tongs & Anvil with Roy Bloom
- Fundamentals of Forging # 2 – Basic Shoemaking with Roy Bloom

- Tool Maintenance with Roy Bloom
- Basic Shoe Modifications with Roy Bloom & Dave Farley

Vettec Product Dating System

Vettec has announced a change in their dating system to guarantee the quality of their products.

Under the new protocols of the dating system, **Vettec will now guarantee the product for 18 months from the date shown on the package.** While the product is typically good past that date, prolonged exposure to heat will shorten the shelf life of any chemical.

Here's an easy way to read their dating system. The first digit represents the year of manufacture (e.g. 8 = 2008; 9 = 2009). The next three digits represent the day of the year of manufacture (e.g. 001 = January 1; 181 = June 30; 349 = December 15). The last two letters are an internal Vettec coding and should be disregarded. If you have any questions, please call us.

KERCKHAERT DF SELECT - NOW AVAILABLE!

- Specifically designed for the hunter jumper market where additional support is required
- Heels are elongated and tapered
- Widest part of the shoe is moved forward, allowing an "extended" heel fit
- Designed similar to the **Werkman™** RP shoe with these enhanced features:

More consistent clip size and punching

Cleaner punching

Tapered from toe to heel

Heel cut is cleaner and provides better "check"
