

FootPro™ DIM Impression Material

FootPro™ DIM Impression Material is a non-toxic, non-allergenic, dental grade silicone that is hand mixed to a moldable consistency and applied to the bottom of the equine foot with a pad to provide either a soft cushion (DIM20), or a firm supportive material (DIM40) when needed.

FEATURES

- Dental grade two-part silicone
- 1:1 Mix Ratio
- Choice of 20A or 40A Durometer
- Variable working/set time
- Non-bonding
- Wide mouthed jars

BENEFITS

- Non-toxic, non-allergenic formula that does not adversely affect structures of the hoof, nor is it affected by moisture
- Easy to mix two equal parts by hand
- Choose between cushion and support
- For faster set, add more catalyst; for slower set, reduce catalyst amount
- Can be easily removed for treatment/inspection
- Convenient storage and easy access

BEST USES

FootPro™ DIM 20 provides cushion for issues such as; thin soles, sensitive frogs or situations where you want to give the horse something very soft to stand on. Cushion allows movement, but slows down the time it takes to reach the limit of the movement. When support is preferred, FootPro™ DIM 40 is an excellent choice. It is most commonly used in the heel area to support the bony column. Support limits movement. Both materials satisfy the need for cushion or support, or a little bit of both.

SPECIFICATIONS

Available in individual unit boxes containing a total of 4 lbs. (2 lbs. Catalyst and 2 lbs. Base) and 2 lbs. (1 lb. Catalyst and 1 lb. Base). Components are not sold separately.
